Billionaire X/Twitter owner **Elon Musk** claimed on Friday that President **Joe Biden** is trying to “get as many illegals in the country as possible” so he can create a “one-party state.”

Reacting to an AP report which said Biden would “prioritize legal status for millions of immigrants,” Musk wrote: Biden’s strategy is very simple:

1. Get as many illegals in the country as possible.
2. Legalize them to create a permanent majority – a one-party state.

That is why they are encouraging so much illegal immigration. Simple, yet effective.

He added, “*Here is the full text of the bill. It sounds so reasonable at first, just like ‘The Committee of Public Safety’ actually meant ‘The Cutting Off Heads Committee’ in revolutionary France.*”

In another post, Musk – who voted for Biden in 2020 – **claimed Biden’s supposed strategy “explains why there are so few deportations, as every deportation is a lost vote.”**

He continued, “*As happened this week, you can literally assault police officers in broad daylight in New York, be released with no bail, give everyone the finger and *still* not be deported!! Outrageous.*”

Deportations in 2023 nearly doubled the numbers of the year prior under Biden, according to the *Washington Post*. However, while more than 142,000 people were deported in 2023, the Biden administration has deported less migrants year-on-year than the Trump administration.
