

# INTEL: US Military Raided ScytI Servers In Germany For Evidence After Vote Switching Scandal

November 14, 2020

According to intelligence sources US Military raided voting machine company ScytI servers in Germany for evidence of manipulation in 2020 US Elections after it was exposed in vote switching scandal by GreatGameIndia. ScytI has a long history of election fraud in various nations including injecting backdoors in its election software. The issue has prompted experts to question why the sensitive job of counting votes was outsourced to a foreign company? How could a [bankrupted Spanish company ScytI count American votes in Spain?](#)

*INTEL US Military Raided ScytI Servers In Germany For Evidence After Vote Switching Scandal*

According to Congressman Louie Gohmert, Texas there is “compelling evidence” of vote switching in the 2020 presidential election compiled by the Spanish electronic voting machine

company ScytI.

The Texas lawmaker said in an interview with Newsmax TV that US military forces seized the company’s server in Frankfurt, Germany. Gohmert said there are some who believe it’s U.S. intelligence “that manipulated all this” to cover themselves.

In a Facebook conference call, Gohmert elaborated that he received the information Sunday from “some of our former intel people that there was extremely compelling evidence that could be gleaned from ScytI,” the Barcelona company that was “responsible for aggregating all the information from all the machines.”

Earlier today Rep. Louie Gohmert told Chris Galcedo on Newsmax that people on the ground in Germany report that ScytI, which hosted elections data Improperly through Spain, was raided by a large US ARMY force and their servers were seized in Frankfurt. The video went viral.

Andrea Widburg at American Thinker earlier reported that ScytI is a Barcelona-based company that provides electronic voting systems worldwide, many of which have proven vulnerable to electronic manipulation. ScytI has (or had) Soros and Democrat party connections. Microsoft co-founder Paul Allen’s Vulcan Capital has invested \$40 million in ScytI.

Tonight we learned from our source that Bill Gates also owns stock in ScytI.

Here is what Rep. Louie Gohmert (R-TX) had to say about this alleged raid earlier today.

Tonight we heard more from our source on this raid in Germany. [Click Link](#)

[The US Military Has Raided And Seized Servers In Germany Tied To The Dominion Election System](#)

The US government, once they determined that this Dominion server was involved in switching votes, then the intelligence community began a search for the server and discovered that the server was in Germany. In order

to get access to that server and have it available for use in a legal manner they had to have the State Department work in tandem with the Department of Justice. They had to request that the government of Germany cooperate in allowing this seizure of this server.

The appropriate documents required to affect that kind of seizure were put in place, signed off on, and it appears there was also US military support in this operation. The US military was not in the lead. But this helps explain why Esper was fired and Miller and Kash Patel were put in place — so that the military would not interfere with the operation in any way.

By getting ahold of the server they now are going to have the direct evidence of when they were instructed to stop counting. They will also discover who gave the direction to stop counting and who initiated the algorithm that started switching votes. The CIA was completely excluded from this operation.
