

# The Power of Your Passport and Citizenship

## HOW POWERFUL IS YOUR PASSPORT?

We map here a world defined by mobility and access and the ease with which the highly mobile citizen can travel. The passport and visa are a key part of that mobility. The more countries you can visit, the more powerful your passport. The map shows the relative power of your passport compared to other passports. The color of the map indicates the relative power of your passport. The darker the color, the more powerful your passport. The lighter the color, the less powerful your passport.
